

~~SECRET~~THE DIRECTOR OF
CENTRAL INTELLIGENCE

National Intelligence Council

1 June 1987

NOTE FOR: DDCI

FROM: C/NIC

Bob --

Per our discussion, to give you the option to elevate pre-coordination drafts early, the attached pre-coordinated draft is addressed to both you and the DCI. We plan to do the same for future estimates, expecting that there may be some that we could agree the DCI ought to have an opportunity to review prior to community coordination, with the focus on the question as to whether we're generally going in the right direction. To facilitate that--the TOR will be added to SRP comments on the left, and how well we address the TOR Key Questions added to the assessment of the SRP comments in the NIO's memo on the right. In this instance in the interest of time, we have added the TOR to the left but haven't modified the memo on the right to address it--will do so in the future. Also note that these particular TOR are so old there are no Key Questions per se. Finally, I draw your attention to the innovation of a precis in front of the Key Judgments--we plan to do this for future estimates should this appear to be useful.

Very respectfully,

Frank B. Horton III
Major General, USAF
